

# STANDARD + ROSES

## GRADING PROCESS

As a consolidator, we assess all farms to ensure we deliver the best products to our clients overseas.

We measure stem lengths excluding bloom heights and use a two-tier bunching system, grading our roses based on the lower tier. When accounting for the bloom height from the top tier, an additional 10 cm is typically added, making our roses the best value in stem length on the market.

Our grading process is thorough, with bloom height graded separately from stem length, ensuring a uniform appearance. We adhere to the "Breeder's Cut" for all varieties, using the cut stage recommended by the breeder for optimal performance and vibrant color.

The foliage is removed six inches from the bottom, with stems cut evenly at the base to ensure proper hydration after processing. We guarantee a consistent, uniform cut stage and bloom size for each bunch.

**EXPLORER**  
CATEGORY:Standard Roses  
COLOR:Huge Headed Blue Red

# SPRAY ROSES

40, 50, 60 cm

**S**pray Roses, unlike traditional single-stemmed roses, feature multiple blooms per stem, creating a "spray" effect. These non-disbudded roses offer greater volume, more blooms, and higher perceived value. They are cut at the ideal stage for optimal bloom development, color intensity, and head size, with over 40 blooms per bunch. Available in 40 cm, 50 cm, and 60 cm grades, they have a vase life of 8-10 days and are offered in quarter boxes (8-10 bunches).

YELLOW BABE

COLOR:  
YELLOW

Bloom Count: 3-5 min  
Aperture: 100%  
Vase Life: 8-10 days  
Stem Length: 40-60 cm
